

RANSOME / RSH 40

Tear through large stumps and logs on your excavator. Built in the US, built to last. You will save tons of time and money by harvesting, processing/downsizing stumps and logs saving unnecessary wear and tear on tub grinders and making much fewer trips to haul this debris away. The RSH Series is designed to pull stumps out of the ground and split in one complete cycle. Once the stumps are split, use the Ransome Stump Harvester to load into tub grinder or container. With this tool, you will not need to have a larger, more expensive tub grinder. Each unit is custom built to suit your needs and includes pins, stiff arm, weld-on plate and a full manufacturers warranty covering material defect and workmanship for up to 12 months.

Weight:	3200 lbs (1451 kg)
Mount Availability:	<ul style="list-style-type: none"> • Direct Mount • Quick Coupler
Dimensions:	<ul style="list-style-type: none"> • Top / Moving Ripper Jaw Width 17 in (432 mm) • Bottom / Fixed Splitter Jaw Width 2.5 in (64 mm)
Note:	Use with a coupler will reduce the splitting force and creates a lot of wear and tear on the coupler so not recommended.

- built to fit most 18-45 ton excavators
- US Built with A572 & AR400 steel
- fully greasable bronze bushings
- chrome plated, induction hardened pins
- replaceable Splitter point and Ripper tips
- grease fittings installed on all moving parts
