

## BLACK SPLITTER / SG1 800

The Black Splitter SG1 800 is designed to fit all models of excavators up to 22,000+/-lb. The unique rotating threaded cone provides extremely efficient wood-splitting power for various timber types including hard, soft, straight, twisted, stumps and roots. The two piece chromium-steel cone with replaceable tip has a double helical thread design with a thread pitch of 24 mm for rapid penetration into the hardest of timber. The cone can also be used to maneuver and position individual logs before and after splitting.

- designed to fit all models of excavators up to 22,000+/- lb
- unique rotating threaded cone providing extremely efficient log splitting power especially for firewood processing
- made for various timber types including hard, soft, straight, twisted, stumps and roots
- two piece chromium-steel cone with replaceable tip
- double helical thread design with a thread pitch of 24 mm for rapid penetration into the hardest of logs and timber

Weight:	365–392 lb
Excavators:	2.5–10 MT
Cone:	<ul style="list-style-type: none"> <li>• chromium-steel</li> <li>• 200 mm diameter</li> <li>• double helical thread</li> <li>• 24 mm thread pitch</li> <li>• 2 pieces</li> </ul>
Grapple:	<ul style="list-style-type: none"> <li>• hardox steel mounted in sinter bushings</li> <li>• surface-hardened pins and bolts</li> <li>• 2 x 7700 lb compression force</li> </ul>
Hydraulic Motor:	<ul style="list-style-type: none"> <li>• optional with max. torque 1724 ft-lb or 1825 ft-lb</li> </ul>
Motor Shaft:	<ul style="list-style-type: none"> <li>• 90 to 100 mm diameter</li> <li>• bearing-mounted and sealed</li> </ul>
